— COLLECTION —

STYLE GUIDE

MERILLAT CABINETRY

FINISHES

A cabinet's finish is just as important as its construction. That's why every piece in the Masterpiece® Collection is hand-finished by our skilled craftspeople. Whether it's hand-spraying, detailing, or distressing, the artistry put into each piece ensures that your cabinetry will be a masterpiece—and completely unique to your home.

MASTERCOAT™ FINISHING SYSTEM

To ensure a lifetime of quality, our proprietary MasterCoat™ Finishing System runs through every aspect of our manufacturing process. From wood selection, to carefully applied paints and stains, to our proprietary topcoat, this process means your cabinetry is crafted to last.

PAINTS

For a smooth, even look, paints give you control over the exact color of your cabinetry and help achieve a uniform feel. Masterpiece® Collection painted finishes also come with our matte finish Suede Topcoat and attractive options like hand-applied highlights and vintage details.

PAINTS WITH HIGHLIGHT

The highlight process adds visual depth and interest in the corners, crevices, and ridges of the cabinetry, bringing out unique qualities of each design. Since it's applied by hand, no two doors are exactly the same.

VINTAGE PAINT

A finish that gives a painted door a sense of history and the feeling of being well-loved. The door's distressed and sanded corners allow a little of the original wood to show through.

PAINTS WITH SUEDE TOPCOAT

A suede topcoat softens the tone of the paint with a matte finish. Like our standard topcoat, a suede topcoat provides durability and resistance to scuffs, stains, UV fade, and cleaning chemicals.

COLORMATCH™

Sometimes, you like a color that's not one of ours. Now, when that's the case, you don't have to compromise. At your request, we can match an extensive selection of Benjamin Moore®, Sherwin-Williams®, Behr® or Valspar® paint colors to achieve the look you want.

STAINS

Available in a range of appealing colors, stains enhance the natural grain, swirls, and texture distinct to each wood species. Masterpiece® Collection specialty treatments such as glaze, distressing, or our Suede Topcoat can add even more beauty, depth, and character to your cabinetry selections.

STAINS WITH GLAZE

Glazing adds depth and dimension to a door. It's done by hand-spraying a flood coat of glaze over the entire base stain, then hand-wiping and detailing the door so the glaze stays in the cracks, crevices, and grain-lines.

DISTRESSED STAIN

Distressing mimics the imperfections of reclaimed wood by adding wormholes, softened corners, rasped edges, and other deliberate methods of loosening the sense of uniformity; all done by hand. A suede topcoat is standard.

STAINS WITH SUEDE TOPCOAT

A suede topcoat softens the overall color tone of a stain with a matte finish. Like our standard topcoat, a suede topcoat provides durability and resistance to scuffs, stains, UV fade, and cleaning chemicals.

SPECIALTY FINISHES

Creating a masterpiece is our specialty. With exacting precision and careful attention to detail, our craftspeople use a variety of techniques to achieve a finished look that's uniquely yours.

Aged Technique

Hand-sanded and complemented by distressing effects like edge rasping, worm holes, softened extremes, and random dent patterns, the Masterpiece® Collection offers aged technique that achieves the look of well-loved cabinetry. Paints and glazes add color, beauty, and dimension, and a dry-brushing technique creates a subtle linear accent. We then top it off with our suede topcoat for a beautiful matte finish.

Aged Picket Fence

Aged Papyrus

Aged Concrete

Aged River Rock

Aged Ash Brown

Aged Bourbon

Aged Tavern

Weathered Technique

Applying a dry brush of finish on an existing base paint or stain, Masterpiece craftspeople can produce a weathered appearance, adding years of timeworn character to achieve a unique look in an instant.

Translucent Technique

A paint that highlights color and luster. A stain that showcases your wood's natural beauty. With the Masterpiece® Collection, you can enjoy the best of both thanks to our expertly blended and applied translucent technique.

Translucent Limestone

Translucent Monument Grey

Translucent Phantom

Translucent Driftwood

WOOD TYPES

Each wood type contains natural color variations from light to dark. The charm of fine wood cabinetry is the subtle, natural variations of color and grain patterns.

ALDER-RUSTIC (RA)

Commonly used for a rugged look with knotholes, burls, and mineral streaks. Can create a modern industrial look with a darker finish.

CHERRY (C)

Brings a rich, elegant feel. Common in fine furniture. Darkens or “mellows” with age. May contain small knots for added character.

HICKORY (H)

The hardest wood with the widest color variation. Random burls, knots, and mineral streaks give each hickory kitchen a unique sensibility.

HICKORY-RUSTIC (RH)

Includes a combination of open knots, wormholes, dramatic color contrast and mineral streaks. These characteristics occur naturally.

MAPLE (M)

A go-to wood species—very uniform and predictable. Therefore takes lighter stain and paint colors well.

OAK (O)

Another popular, versatile wood with rich textures and grain patterns that lends itself to practically any application.

QUARTERSAWN (Q)

This technique of cutting a tree at a nearly 90° angle creates a parallel and orderly feel to the grain—as opposed to the natural variances in the grain you'll find with traditional woods.

CRAFTED HARDWOOD VENEER (CR)

This new veneer is designed for a more consistent color and grain pattern on every door. It's engineered to give the look of Quartersawn Maple, Oak, or Cherry and is less susceptible to the expanding and contracting that comes with solid wood.

EVERCORE® (E)

A smooth surface that's receptive to paint. Solid construction that's resistant to climate. EverCore® is a versatile, durable option coveted by homeowners and designers alike. With the addition of several styles and finishes, the Masterpiece® Collection is showcasing EverCore like never before.
All Masterpiece Paint with Highlight and paint-based Weathered Technique finishes currently available on Maple will now be available on EverCore, in Standard or Suede topcoat.

SELECT YOUR STYLE

Choosing the right door for your design starts with the selection of one of six distinctive styles. Each style responds to finishes differently, and the combination can deliver a design that's uniquely yours.

SHAKER

Shaker is a style term given to specific door styles that provide a clean, orderly, and simple look.

RECESSED

A recessed panel door has a flat panel set back inside the frame of a door.

RAISED

A raised panel door has a panel that rises in the center and is somewhat decorative.

SLAB

A slab-style door has the look of a single piece of wood with no panel or decoration. Drawer fronts are also available as slab on many styles.

FULL OVERLAY

A full overlay door style has very little cabinet frame showing around each door and drawer front, creating a seamless look.

PARTIAL OVERLAY

A partial overlay door style shows some cabinet frame around each door and drawer front.

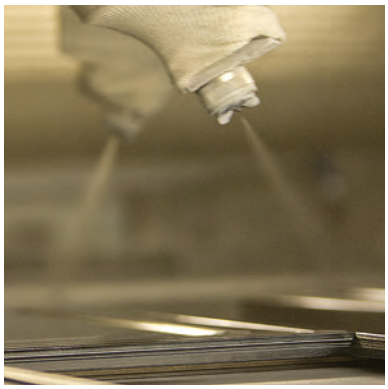
EXCEPTIONAL QUALITY

The Masterpiece® Collection is made exceptional through its construction. From the added strength of our 90-lb rated drawer slides to the durability made possible by our MasterCoat™ finishing system, quality is at the heart of all we do.



MASTERCOAT™ FINISHING SYSTEM

Our proprietary finishing system features two layers of oven-baked protective top coat for durability, protecting against the challenges of everyday life.

I-BEAM CONSTRUCTION

I-Beam construction helps cabinets stay strong, stable and square during delivery, throughout installation and beyond.

SOLID-WOOD DOVETAIL DRAWERS

This sturdy joinery is capable of withstanding generations of use. You'll find it on all four sides of our drawers.

90-LB DRAWER SLIDES

Our 90-lb, soft-closing drawer slides help the drawer stand up to just about anything you put in them.

FULL EXTENSION DRAWERS

Drawers extend beyond the cabinet face frame so you can see and use the whole drawer.

SOFT-CLOSING DRAWERS AND DOORS

Soft-closing hinges and drawer glides close softly and quietly with just a tap, reducing noise and pinched fingers.
