

### Jeanine Yancy

DESIGNER | BRIGHTON, MI

*B.S. Interior Design, Adrian College*

Designing since 2008 | Joined KSI 2018

Jeanine’s love of residential design began in high school with her first AutoCAD course and grew as she pursued her degree in Interior Design in college. She honed her technical expertise working with a major cabinetry manufacturer and learning the importance of precision in the design process. “I like that there are so many parameters to consider. It’s like putting a puzzle together. That’s what sparked my interest in kitchen and bath design specifically.”

Inspiration is never lacking for Jeanine. “It is really drawn from my clients and getting to know them and their home. Understanding their unique needs and wants is what drives my creativity to come up with design solutions that are both beautiful and functional.”

As a working mom, Jeanine understands how hectic life can be. “I strive to make the remodeling experience easier, less stressful and more fun for my clients. We achieve a better outcome that way – a beautiful new space they will enjoy now and for years to come.”
