

Jim McVeigh

DESIGNER

A.A. Interior Design, Baker College

Designing since 1992 | Joined KSI 2011

With over 30 years experience in home remodeling and construction, Jim has taken on some of his client's toughest design challenges. He loves collaborating with homeowners and contractors throughout design and installation to ensure vision becomes reality. His experience makes him both a student of and teacher in the industry as Jim regularly lends his expertise to colleagues and team members.

Jim's knowledge of the building trades along with his expertise in space planning, maximizing functionality and project management align perfectly with the kinds of projects he enjoys most. He believes a big part of creativity is helping people solve problems and loves designing spaces that help clients get the most out of their kitchen or bath.

Throughout his career, Jim has been involved with the Home Builders Association (HBA), including having served as a board member. He won 2021 Best of Houzz for Design and Service for one of his projects. He attributes his creativity and success to regularly "recharging his battery" with downtime spent time hunting and relaxing with family & friends.
